Welcome

At NEALPACK our motivation lies in engineering excellence and pioneering packaging innovations.

In diverse industries such as foods and beverages, chemicals, and pharmaceuticals, we excel in crafting personalized approaches that elevate efficiency and safety.

Backed by more than 20 years of solid experiences and a devoted team of passionate engineers and specialists, we take satisfaction in providing comprehensive processing and packaging solutions that cater to your distinct requirements.

Our strong dedication to quality, sustainability, and customer contentment forms the essence of our combined endeavors.

About Us

At NEALPACK, we blend African ingenuity, Italian engineering excellence, and a global outlook. Our identity is not defined by borders, but by a fusion of cultures and capabilities. As our engineers often say — “There’s more than one way to do the math.”

About Us

Our Vision

Our vision is to empower businesses across Africa and beyond with cutting-edge packaging solutions, while fostering sustainability for future generations.

Our Mission

At NEALPACK, our mission is to exceed our clients' expectations by providing top-notch world-class packaging solutions through continuous innovation, strategic partnerships, and a customer-centric approach. We strive to enhance their brand's impact, maximize efficiency, and contribute to a greener and more sustainable future.

Our Commitment To Our Valued Clients

Excellent Customer Care

Local Services

Quick Aftermarket and Spare Support

What We Do

As a leading packaging and equipment supplier, NEALPACK offers a wide range of fully-engineered integrated processing and packaging solutions.

Completely designed and manufactured (100%) by the world's best manufacturers in Italy, the said solutions meet the various needs of the food and beverages, pharmaceutical and chemical industries, among others, across Africa and beyond.

We are always by our customers' side, physical or virtual. We do consulting and training to help them meet their goals.

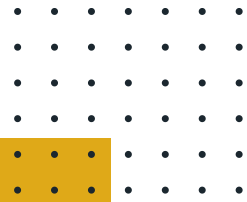

Desiring to leave a very positive impact to the market and industry, we 'fight' to exceed their and our stakeholders' expectations.

Discover how our cutting-edge technology and eco-friendly solutions contribute to a greener future, specifically in

- Chemical detergents and cosmetic industries
- Pharmaceutical industries

Customer Care Program

At NEALPACK, we prioritize your needs with:

- Comprehensive planning and guidance from inception to completion
- Unwavering support both before, during, and after installation
- Access to seasoned food technologists, bringing extensive expertise in food testing and innovation to enhance your product development.

Remote Assistance

Experience seamless connectivity with our remote assist digital support service, providing instant access to our global expertise.

From installation and testing to commissioning, fault finding, troubleshooting, factory acceptance tests, and user acceptance tests, users can now receive tailored support remotely.

Take advantage of our remote capabilities, including:

- Remote diagnosis Remote troubleshooting
- Remote commissioning Software and firmware updates

With our digital support service, stay connected and ensure the efficiency of your operations from anywhere in the world

Enjoy the following benefits:

- Eliminate the need to wait for in-person service or training visits
- Minimize downtime, maximize production, and avoid delays.
- Save costs associated with in-person visits Receive real-time assistance and support

Our Commitment to Sustainability

Our commitment aligns with global development priorities, particularly the Sustainable Development Goals particularly:

SDG 9 – Building resilient, innovation-led infrastructure

SDG 12 – Promoting responsible production through smart packaging solutions

SDG 13 – Reducing environmental impact through advanced, energy-efficient technologies

SDG 17 – Driving progress through international partnerships and collaboration

Every solution we deliver is designed to create long-term value — not only for our clients, but for the environment and the communities they serve.

Market Segments We Serve

We specialize in providing processing and packaging solutions for various market segments.

Processing

- Milk and dairy processing
- Meat (red and white) processing
- Fruit and vegetable processing
- Sugar processing
- Grain / dry foods processing
- Cotton processing
- Beverage processing
- Fresh, canned, and frozen food processing
- Oil and fat processing
- Pasta processing
- Snacks and cereals processing
- Coffee roaster processing (plant) and storage
- Fresh fruits processing (plant)

Packaging

- Bakery products (like biscuits, cakes, etc.)
- Beverages (coffee, tea, and fruit drinks)
- Snacks
- Cheese and other dairy products
- Confectionery (sweets and chocolates)
- Pasta
- Meat and poultry
- Milled products (refined grains: wheat, corn, and rice flour)
- Produce (agricultural products)
- Fish and other seafood
- IQF (individual quick freezing) foods
- Processed foods (like tomato paste, ketchup, etc.)
- Juice, water, wine, spirits, beer in cans, pet and glass bottles.

SIPA SOLUTIONS

SIPA Group designs, builds, and manufactures complete processing lines and equipment for the PET packaging, beverage, and liquid food sectors, leveraging 360° industrial expertise.

PREFORM SYSTEMS:

Precision-engineered XFORM and XTREME platforms, including multi-cavity molds, optimized for high-volume, lightweight preform production.

BLOW MOLDERS:

State-of-the-art XTRA Rotary and SFL Linear systems, designed for flexibility and massive-scale bottle production across all beverage categories.

INTEGRATED LINES:

Complete turnkey solutions, including Sincro Sincro Bloc for seamless bottle-to-case synchronization and high-performance filling systems.

END-OF-LINE AUTOMATION:

Robust robotic and traditional cartoning, case packing, and palletizing systems designed for optimal shipping efficiency.

Company Value

Partner Vendor

CORFILL INTERNATIONAL

Corfill International is an Italian-based company (located near Mantova, Italy) with over 50 years of experience in the design, construction, and engineering of filling machines and complete bottling lines for the beverage and liquid food industries.

- **High-Tech Filling Machines:** They design and manufacture advanced filling systems for glass, PET, and aluminum containers. These range in capacity from 6,000 to over 80,000 containers per hour, covering both carbonated beverages and flat/still liquids (using cold or hot-fill methods up to 85°C)
- **Turnkey Complete Lines:** Beyond individual machines, they engineer entire production setups. This includes everything from depalletizers (container feeding) to filling, labeling, packaging, and final palletization
- **Specialized Valves:** They are well-known for their patented electro-pneumatic filling valves (ELP), which automatically regulate liquid levels in the bottle to drastically reduce waste.

La Parmigiana

LA PARMIGIANA offers pasta machines with versatile presses, semi-automatic and automatic functions for ravioli, gnocchi, and sheeters, providing comprehensive solutions for high-quality pasta production.

We have the cooling system for the production of fresh pasta in catering machines or small laboratories.

LA PARMIGIANA COMBINED AND NON-COMBINED PASTA MACHINES: When evaluating the excellence of a pasta machine, it is imperative to refrain from relying solely on aesthetic or dimensional criteria, although acknowledging the often limited workspace. For those seeking to diversify their pasta production with various formats such as simple extruded pasta, filled pasta, and gnocchi, the professional pasta machine market presents two distinct options: single-function and multi-function, or combined machines.

Company Value Partner Vendor

Lafer Packaging

LAFERPACK provides packaging machines and automatic lines for flexible film packaging. The company offers dedicated solutions for the food, technical, and pharmaceutical industries.

LAFER Disko

LAFER HFFS Packaging

LAFER HFFS Packaging Scontornata

FOOD: Candies, lollipops, chewing gums, cookies, sweets, chocolates, wafers, bread, pizza, pasta, cheese, fruits and vegetables, pet foods, etc. (including boxes and trays, multi-packs)

NON-FOOD: Home care, personal care, hardware, plastic articles, plastic cutlery, technical articles, plastic fittings, napkins, etc. (in boxes and trays, multi-packs)

Company Value Partner Vendor

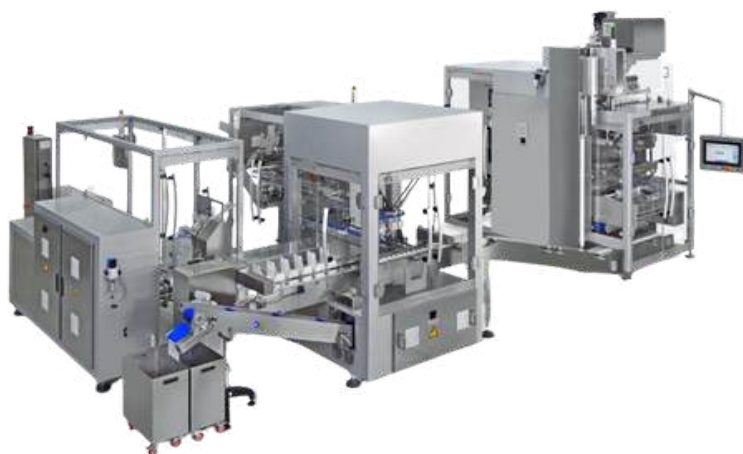

Omag

OMAG produces packaging and filling machines for the food, pharmaceutical and cosmetic industries, in addition to complete packaging lines.

OMAG cutting-edge packaging machines for sachets and sticks: the CP, a packaging machine with a plate-welding system for sachets sealed on four sides, also shaped, and the CS packaging machine for stick-packs.

Partner Vendor

ILPRA

ILPRA, with over six decades of Italian engineering excellence, specializes in customized packaging solutions across food, medical, and cosmetic sectors.

The company offers a wide range of machines including tray sealers, fill-seal systems, thermoformers, and fully integrated form-fill-seal lines. ILPRA also provides advanced MAP and skin packaging technologies, along with end-of-line automation for efficient, sustainable operations.

ILPRA Machinery

Packint Solutions

PACKINT designs and manufactures complete, cutting-edge equipment and processing lines for artisanal and industrial bean-to-bar chocolate production. Merging Italian engineering exceeds of field expertise, Packint delivers custom, turn-key solutions that control every stage of chocolate manufacturing, ensuring ultimate flavor development and unmatched mechanical reliability.

PACKINT automatic bean-to-bar processing lines are built to scale with your production, handling capacities from craft-level batches to high-volume industrial outputs. Our systems seamlessly integrate the entire manufacturing lifecycle—including precision cocoa bean roasting, cracking, winnowing, and multi-stage refining down to a silky-smooth 18 microns. Engineered for energy efficiency and user-friendly operation, Packint lines allow producers to process raw single-origin cocoa into premium finished chocolate with total control over temperature, texture, and flavor profiles.

PACKINT integrated ball mill refining and conching systems for micro-particle reduction

Premium craft chocolate bars, chocolate chips, and enrobed confections

Company Value Partner Vendor

Navatta Group

Navatta Group designs, builds, and installs complete, state-of-the-art lines, systems, and machines for the processing of fresh fruit, tomatoes, and vegetables. Founded in Parma, Italy—the heart of the European Food Valley—the group integrates master craftsmanship with cutting-edge automation to deliver reliable, turn-key solutions that elevate raw crops into premium industrial ingredients.

NAVATTA GROUP fruit and vegetable processing lines are engineered for ultimate operational flexibility, handling high-performance capacities from 3 to 120 tons per hour of raw incoming product. Their patented "cold extraction" technology for fruit and tomato purees delivers exceptional yields while fully preserving natural color, texture, and delicate organoleptic profiles. From energy-saving multi-effect forced circulation evaporators to fully automated aseptic filling lines designed for drums, bins, and bag-in-box formats, Navatta systems provide unmatched efficiency, absolute sterilization, and massive energy-recovery savings.

NAVATTA GROUP patented juice extraction systems and industrial multi-effect evaporators

Premium juices, nectars, purees, tomato pastes, and aseptically packaged concentrates

Macchi S.p.A.

MACCHI is a global pioneer and premier manufacturer dedicated exclusively to high-performance blown film extrusion lines. Founded in Venegono Inferiore, Italy, in 1961, the company engineers bespoke, multi-layer extrusion systems that transform raw resins into high-barrier, sustainable, and eligrade flexible packaging films.

MACCHI extrusion systems deliver outstanding productivity and unparalleled process control across a broad range of flexible film structures. From standard three-layer Coex Flex lines to highly complex nine- and eleven-layer barrier film installations, Macchi's technology is optimized for downgauging, energy savings, and the seamless integration of recycled resins. Featuring industry-leading IBC cooling rings, high-precision automated thickness controllers, and advanced BO Series tension-controlled winders, Macchi systems enable processors to manufacture high-clarity agricultural, medical, and high-barrier food packaging films with flawless consistency and structural integrity.

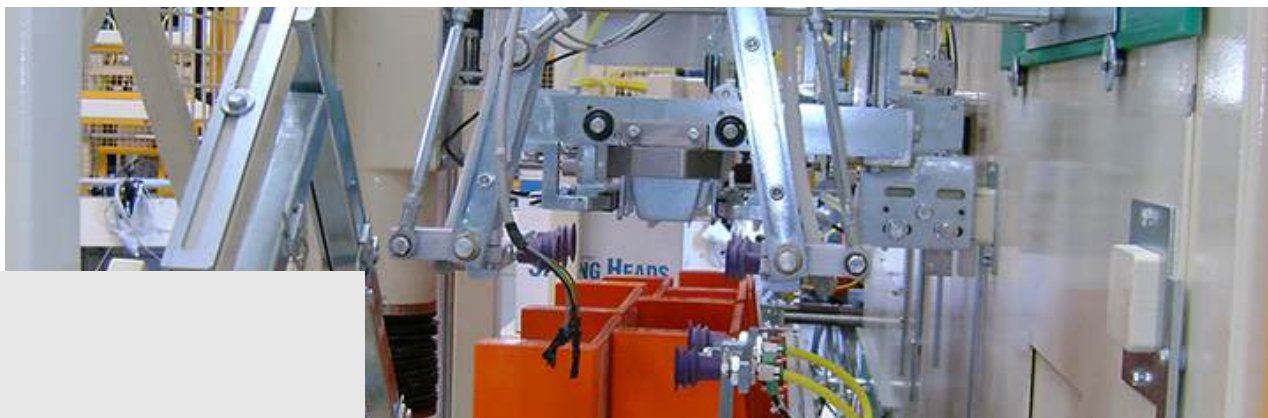

MACCHI Coex Flex multi-layer co-extrusion die-heads and advanced winder systems

High-barrier flexible packaging films, collation shrink wraps, and multi-layer food pouches

Company Value

Partner Vendor

SACMI

SACMI is an international leader in the manufacture of machines and complete plants for the Beverage, Closures, and Container industries. Founded in Imola, Italy, in 1919, the group provides advanced, highly integrated technological solutions that cover the entire production chain—from raw resin preparation to the finished, labeled bottle—delivering maximum productivity, energy efficiency, and quality control.

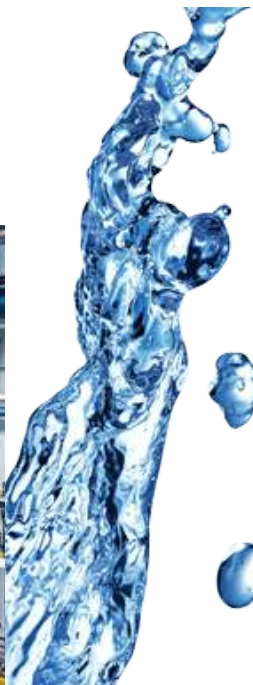

SACMI rigid packaging and beverage lines set the global standard for high-performance production. Utilizing proprietary Continuous Compression Molding (CCM) technology,

SACMI machines produce plastic caps with shorter cycle times, lower process temperatures, and unmatched weight consistency compared to traditional injection molding. Their advanced Injection Preform System (IPS) platforms deliver rapid, energy-efficient production of PET preforms. Integrated with cutting-edge vision inspection systems and high-speed rotary labeling machines,

SACMI enables manufacturers to optimize resource consumption, minimize plastic waste, and achieve absolute packaging precision at scale.

Partner Vendor

GLOBUS HOLDINGS LIMITED

Globus Holdings Limited is an integrated, multi-disciplinary engineering and management consulting firm headquartered in Nairobi, Kenya.

Founded in May 2012, the company provides specialized, data-driven consultancy solutions to complex engineering and management challenges globally.

Company Value Partner Vendor

ROBOQBO

ROBOQBO is a world-class pioneer in advanced all-in-one transformation systems for food processing, professional kitchens, and laboratories. Founded in Bentivoglio (Bologna), Italy, in 1978, the company has completely rewritten the processing rulebook by consolidating multiple traditional prep steps into a single, highly sophisticated, and compact automated unit

ROBOQBO systems are built to radically simplify workflows across the food, pastry, chocolate, and cosmetics industries. Their patented flagship Qbo technology replaces separate appliances by cutting, mixing, crushing, homogenizing, cooking, and cooling within a single uninterrupted cycle.

Operating under a complete vacuum to protect vibrant natural colors and delicate flavors from oxidation, the system also features rapid pressurized steam heating up to 125°C and fast cooling systems.

With a Windows PC-based control system managing exact micro-temperatures down to $\pm 0.3^{\circ}\text{C}$, Roboqbo guarantees flawless recipe replication while cutting down processing times by up to 75%.

Our Core Values

Excellence

At NEALPACK, we are driven to deliver nothing but the best. Our team of highly qualified engineers and professionals consistently strive for excellence, ensuring that our packaging solutions surpass industry standards and elevate our customer's brand's performance.

Innovation for Impact

We embrace innovation and cutting-edge technology to stay at the forefront of the packaging industry. Our forward-thinking approach enables us to create customized and sustainable solutions that make a lasting impact on customer's business and the environment.

Customer Centric Approach

Your success is our priority. We listen to your unique needs and objectives, and with utmost dedication, we passionately tailor packaging solutions that add value and create a memorable experience for your customers.
